S-Master Digital Amplifier

原音再造

S-Master 全數碼放大器 S-Master Full Digital Amplifier

Sony 革命性設計的 S-Master 全數碼放大器以逼真的原音重現技術，帶領影音放大器邁進高性能表現的新紀元。

與傳統的模擬式放大器大大不同，S-Master 全數碼放大器使用 1-Bit 的音頻訊號通過數碼電路處理（與 Super Audio CD 相同），確保訊號由音源直至輸出時都保持原來的音色。

Sony's revolutionary S-Master Full Digital Amplifier is ushering in a new era of high performance amplifiers with the most authentic reproduction of sound anywhere!

Unlike conventional analogue amplifier's designs, the S-Master Full Digital Amplifier processes only 1-Bit audio signals (similar to that of Super Audio CD signals) entirely through digital circuitry, the S-Master Full Digital Amplifier preserves the purity of the digital audio signal from source right up to output.

透過簡化訊號傳輸程序，將失真的機會減至最少，並可降低熱力的產生。除可令機身體積更纖細輕巧之外，更可確保 S-Master 在音色表現方面達至高度原音的境界。而且 S-Master 能產生更廣闊的動態範圍及頻率反應，因此可有效傳送如 Super Audio CD 等更高質素的音響格式，讓音色更原始，更淨化，讓你與真音樂的距離拉近。

By simplifying the signal path, distortion is minimized and the generation of heat is reduced. Other than allowing the digital amplifier to be made smaller and sleeker, this enables the S-Master to reproduce music with the utmost fidelity to the original source. Also capable of reproducing a wide dynamic range and frequency response, the S-Master efficiently handles the delivery of higher quality of sound, such as Super Audio CDs. Sony new Home Theatre systems bring the pristine, clear and sparkling audio performance and let you closer to realistic music.

S-Master 全數碼放大器音響質素更細膩、效果更豐富。整體音色表現有 256 倍的顯著改進，讓您感受前所未有的音樂體驗。

S-Master Full Digital Amplifier improve overall sound performance by an amazing 256 times, for an audio experience that is truly unparalleled.

Optimised copper wiring in the speaker cable and terminal offers three times the density of other models, further reducing impedance and improving sound quality.

當 Tall Boy 揚聲器演繹廣闊音的同時，重低音揚聲器的獨特設計亦創造出超低頻強勁音色。重低音揚聲器的揚聲單元向下裝設，令音頻從地面產生共鳴。36毫米厚身製底板有效控餘震，同時可將低頻音色從不同方向傳送至家居空間。

Thanks to the greater volume and increased range of the Tall Boy speakers, the DAV-DZ1000 Subwoofer has been designed to focus solely on deep bass frequencies via a special down-flow unit that makes sound resonate from the floor. To improve the lower frequencies even further a thick 36mm wooden baseboard controls unwanted vibrations while evenly, consistently projecting bass in all directions and any living room decor.
