Press Release

New 5.1-ch Sound Bar from Sony Delivers Immersive Surround Sound for Home Entertainment

HT-RT5

- **Immersive surround sound with various sound stage/modes**
- **Power-packed 550W of true 5.1 channel surround sound**
- **5.1ch Sound Bar with a centre speaker, wireless rear speakers and a wireless subwoofer**
- **Stream online music from your mobile with Google Cast™ and Spotify Connect™**
- **Enjoy wireless Multi-room music listening with SongPal Link™**

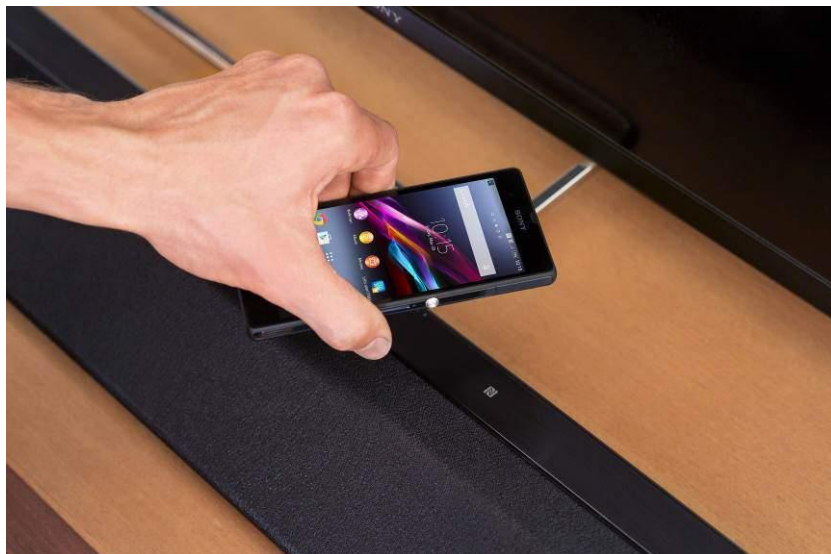

Hong Kong, September 8, 2015 – Sony’s latest Sound Bar HT-RT5 treats you to an authentic home cinema experience – with room-filling audio from 5.1ch speakers, and a wide selection of online music services. The space-saving HT-RT5 brings something really special to movie nights, fun-filled parties and everyday music listening around the home.

There is an awesome 550W of dynamic multi-channel power on tap: you will hear – and feel – each orchestral crescendo and the crunch of every explosion. A choice of sound modes tailors your preferences to whatever is on screen, including Football Mode, Cinema Studio 9.1ch, and Digital Music Arena.

The slim, stylish 3-channel main unit fits discreetly in front your TV or can be wall mounted. The main unit includes a dedicated centre speaker that assures crystal clear dialogue and transparent treble, regardless of volume. It is combined with two wireless rear speakers and a separate wireless subwoofer. Set-up is wonderfully easy: each additional speaker connects automatically, with no loudspeaker cables needed. The system even comes supplied with a microphone to test your room's acoustics using Digital Cinema Auto Calibration DX ensuring the best possible sound wherever the speakers are placed. You're rewarded with 5.1 channels of immersive audio, with solid bass response that draws you in to the heart of the action. Today's high-quality listening formats are naturally catered for, with support for HD audio sources like DTS-HD and Dolby True HD.

Pristine movie soundtracks are only the start with the HT-RT5. There's a huge choice of online music entertainment to enjoy, with Spotify Connect™ and over 100 other music services including Google Play™ Music. Google Cast™ makes it easy to 'cast' online music and radio services seamlessly from your mobile device. Just tap the Cast icon and playback is transferred seamlessly from your smartphone or tablet to the Sound Bar for everyone to enjoy.

One-touch listening via NFC lets you stream music using Bluetooth® with soaring highs and full, rich bass with a single touch of your smartphone or tablet. LDAC™ technology from Sony transmits three times more audio data than typical Bluetooth® connections, for super-clear, detailed sound you'll love.

Wireless Multi-room listening brings your music wherever and whenever you want to. Use your phone or tablet to control playback with our friendly SongPal™ app. It's easy to group the HT-RT5 with other compatible wireless speakers and hi-fi systems around the house. You'll instantly hear the same sound everywhere at once – great for entertaining a house full of party guests with your favourite Spotify playlist.

The new 5.1ch Sound Bar HT-RT5 from Sony will be available from October 2015 at HK\$5,480.
