## Press Release

### Be Ready to Step Up to Bigger and Better Sound with Sony's New Sound Bar Systems

*5.1ch Home Cinema System with Bluetooth® HT-RT3*

**Hong Kong, August 17, 2016** – The new 5.1ch surround Sound Bar system HT-RT3 and HT-CT390 2.1ch Bluetooth® Sound Bar from Sony now make having a home cinema a reality for many homeowners. Equipped with Sony's S-Master Digital Amplifier, the HT-RT3 and HT-CT390 produce only the purest sound quality by minimising distortion.

Delivering a phenomenal 600W of power through a slim, stylish Sound Bar plus dedicated subwoofer and rear speakers, the HT-RT3 is ready to go, straight out of the box – all in just a few seconds of setting up! It is refreshingly straightforward, with fewer boxes and wires to worry about than regular 5.1 systems. Simply plug it in to your TV via HDMI, wire up the speakers via the colour-coded connections, and you're all ready to watch your favourite movies.

Expect deep, room-filling sound with the HT-RT3, and be enveloped in real surround sound when you pair it to the subwoofer for a loud and strong bass, bringing your movies to life. The two rear speakers ensure the delivery of a balanced, wide frequency audio response.

*HT-CT390 2.1ch Sound Bar with Bluetooth®*

The HT-CT390 sound bar on the other hand lets you feel the full force of every movie soundtrack with its 300W power output. Its two drivers have been carefully engineered to deliver a balanced audio response across all frequencies, while a wireless subwoofer adds more body to your bass – so every explosion and action sequence hits harder than ever before.

Sony's cinematic S-Force Front Sound technology further puts you right at the heart of the movies you love by naturally emulating 3D sound fields, so that you can enjoy rich, high-fidelity audio in a wider listening area. A wireless subwoofer also delivers hard-hitting bass for you to add impact to your movies and soundtracks.

Streaming music through the sound bar has never been easier. With Bluetooth® on board, you can enjoy music playback streamed wirelessly from your smartphone. One-touch connection via NFC technology further removes the need for complex set-up sequences.

The 5.1ch surround Sound Bar system HT-RT3 and 2.1ch Bluetooth® Sound Bar HT-CT390 will be available from August 2016 at HK\$1,980 and HK\$2,480 respectively (selling prices of Sony Store).

For customer enquiries, please contact Sony hotline service at (852) 2345-2966.
