Sony Introduces New Compact Sound Bar Series that Stylishly Match Your Living Room

HT-MT500

Hong Kong, April 28, 2017 – Sony today introduced new sound bar series that offer the best solution for all your audio needs at home. The HT-MT500 and HT-MT300 as well as the HT-CT800 and HT-CT290 will stylishly co-ordinate with the current trends in living room design, whilst providing a pure and natural, high quality sound experience, while acting as a wireless speaker for music listening.

But it's not just about the look. The High-Resolution Audio enabled MT500 can even upscale and enhance all the sounds that it plays out. These compact sound bars also come with a slim wireless subwoofer that is small enough to blend into your living room, you can even hide it under your sofa to really feel the bass.

With Bluetooth® and NFC connections to stream music from your phone and the flick of your fingertips, these are not just sound bars but smart wireless speakers for the home as well. A USB port allows you to connect USB devices for easy playback.

A stylish match

The slim form is created with the design conscious in mind making sure a sound bar can sit by the TV in the living room without standing out, obstructing the view or hiding the TV IR sensor. Designed with a new compact concept in style, colour and materials used to blend into your living room, both the MT500 and MT300 are made with a tactile finish where the speaker casing is

covered in a leather look surface and matt grill front. The colours are chosen to match the latest interior design trends, available in charcoal black or the option of crèmewhite.

Stream your music

The MT300 will provide smart connections via Bluetooth® and NFC, while the MT500 also comes with Chromecast built-in and Spotify Connect so you have access to over 100 music-streaming apps. For extra simplicity, the MT500 also has a Music Service button to quickly access the last song you were playing from your Spotify Premium account, without the need to connect and play from you mobile phone or tablet.

These sound bars may be compact in size, but not in sound. They can improve the sound of whatever you are watching thanks to S-Force PRO Front Surround, emulating cinema style surround sound and putting you at the heard to the movies you love.

To up the ante, enable Sofa Mode and you will still be able to feel the low frequency effects when the subwoofer is positioned horizontally underneath the sofa. As another option, the sub can be placed vertically next to another piece of furniture if desired.

HT-CT800

Powerful sound in slim design

The HT-CT800 is a stylish sound bar with 4K and HDR support. The ultra-slim design fits seamlessly in just about any home décor, lying flat on a TV stand or discreetly on a wall. The powerful external subwoofer is wireless, providing more options for setup.

While the HT-CT800 might be thinner in size, it's huge on sound and features! With Dolby® TrueHD & DTS-HD® Master Audio format support, listeners can enjoy the uncompressed soundtracks of your favorite movies and TV shows – just as the director intended. For video, 4K HDR compatibility with HDCP 2.2 enables viewers to experience exceptional detail, colour and contrast, even when connected through the sound bar. With three HDMI inputs, one HDMI ARC output, a USB input, as well as digital optical and analog connections, expanding a home theatre setup is easy.

The CT800 supports a wireless surround sound experience that allows listeners to add compatible Sony's wireless speakers as discrete rear surround sound speakers to enjoy an even more immersive cinematic experience. The CT800 also has multi-room capability, making it possible to stream to different rooms and listen to the same great music all around the house. The HT-CT800 also supports multi-room capability, making it possible to stream to different rooms and listen to the same great music all around the house. It also has a Music Service button to carry on listening to the last song you played from your Spotify account.

The HT-CT290 is a stylish sound bar with a space-saving design that delivers room-filling sound with its 300W total output power. This Bluetooth-enabled sound bar brings movies and music to life with virtual surround sound and powerful bass delivered via a wireless subwoofer. Stream music easily from a smartphone and control your sound bar and TV with a single remote. All in a stylish, slim design that lays flat or mounts discreetly on a wall.

Sony's new Sound Bar series are available as follow:
