Press Release

New “Imaging Edge Mobile” Software Enhances Mobile Connectivity and Expands the Creative Capabilities of Sony Cameras

‘Transfer & Tagging add-on’

Hong Kong, January 29, 2019 – Sony today announced the release of a new “Imaging Edge™” mobile application plus several updates to the ‘Remote’, ‘Viewer’ and ‘Edit’ desktop applications, that will bring exciting new features to all Sony imaging customers ranging from casual hobbyists to working professionals.

New Imaging Edge Mobile Applications

The newly introduced mobile application named ‘Imaging Edge Mobile¹’ is the successor to Sony’s PlayMemories Mobile™ app and will offer instant transfer of images from camera to a connected mobile device while shooting. Images can be transferred when utilising the new “Auto background transfer to Smartphone” functionality², allowing users to easily share content direct from their phone to social media platforms. The mobile application also supports 4K movie transfer³ and remote control functionality.

For professional photographers, Sony will be releasing a new mobile application ‘Transfer & Tagging add-on⁴’ that will support instant delivery workflow by allowing users to transfer content to their mobile devices via the camera’s FTP background transfer⁵, without distraction from their shooting. It also enables voice input⁶ for text captioning to help streamline communication and overall workflow between photographers and other team members. There is also an online function that will allow you to sync Caption Glossary between multiple devices.

Sony’s new Imaging Edge mobile application and ‘Transfer & Tagging add-on’ will be available in March 2019.

Enhancements of ‘Remote’ ‘Viewer’ ‘Edit’ Desktop Applications

The desktop version of Sony’s “Imaging Edge” application will be updated as well, with workflow support of time-lapse movie⁷ creation, making it an ideal match for Sony’s newest interchangeable lens cameras with built-in interval recording. Other new features to maximise usability have been added as well, such as comparison display and collection functions, as well as a new and improved user interface.

The latest Version 1.4 of Desktop Applications ‘Remote’ ‘Viewer’ ‘Edit’ will be available from end of January 2019.

For more information on the new application updates, please visit the Imaging Edge website at <https://imagingedge.sony.net>.
