Press Release

Sony's New Sound Bar Brings Cinema Quality in the Comfort of Your Living Room

Hong Kong, May 3, 2019 – Upgrade your home theatre set up with Sony's new HT-X8500 sound bar speaker. Experience cinematic surround sound from the comfort of your home with Dolby Atmos® and DTS:X® support on the new X8500 soundbar.

This 2.1ch single soundbar delivers object-based cinema sound which puts you in the middle of the action. Thanks to Sony's unique Digital Signal Processing technologies such as Vertical Surround Engine, max 7.1.2ch surround sound can be experienced from the X8500 without the need for extra speakers. The sound bar with a built-in dual subwoofer has iconic subwoofer ducts on the side, delivering powerful deep bass sound. With Cinema Mode on, one of the seven optimised sound modes, you can experience every film at its best.

The X8500 has eARC support for high quality audio codecs to pass through from your TV to your soundbar. BLUETOOTH® wireless connectivity¹ is also available which allows you to wirelessly connect your soundbar to your TV to achieve a clean look in your home. You can also listen to music from your smartphone via BLUETOOTH®.

¹ As for Wireless connection via Bluetooth®, BRAVIA® supporting Bluetooth® A2DP (Advanced Audio Distribution Profile) is needed.

Sleek design

Integrate your new cinema tech into the home seamlessly thanks to the sleek design of the new X8500, featuring a stylish bar design with punching metal.

The HT-X8500 sound bar speaker from Sony will be available from mid-May 2019 and its price will be announced later.

For customer enquiries, please contact Sony hotline service at (852) 2833-5129.
