Sony Enhances Sound Bar Line-up with Introduction of HT-G700

Immerse yourself in TV and movies with captivating, dynamic surround sound from the HT-G700 3.1ch sound bar featuring Dolby Atmos® and a dedicated center speaker for clearer dialogue

Hong Kong, May 22, 2020 – Sony today introduced a new sound bar **HT-G700**, which is perfect for enjoying TV and movies with powerful and immersive sound in the comfort of your own home. The **HT-G700** is a 3.1ch Dolby Atmos® and DTS:X sound bar that couples immersive cinematic surround sound with clear dialogue, so you can lose yourself completely in your favourite TV programmes and movies.

Cinematic surround sound and clear dialogue

The **HT-G700** is equipped with the Immersive Audio Enhancement, providing an upgraded surround experience seamlessly enveloping listeners with up to 7.1.2 channel virtual surround sound. The **HT-G700** has three front speakers, combined with Sony's signal processing, which enables sound placements that can envelop you in all directions, providing an experience that carries the user away into the world of movies and music through the latest technology. This new signal processing is also advanced to deliver surround sound to a wider area.

Furthermore, the finely tuned S-Force PRO for HT-G700 uplifts sound to fit a wider TV screen height (over 55 inch), enabling viewers to relive moments in newfound clarity and depth. Plus, by selecting the Immersive AE (Audio Enhancement) button on the remote, the **HT-G700** can also upscale even regular stereo audio to up to 7.1.2 channel virtual surround sound so every TV show and movie gets the surround sound treatment.

In addition, the **HT-G700** offers a dedicated center speaker so that vocals can be heard clearly, whether it's quick-fire dialogue in your favourite TV shows or whispered lines in a Hollywood movie. It's also great for music, creating a rich, detailed listening experience.

Choose your perfect setting

The sound or audio mode best suited to what you're listening to can be selected directly via a button on the remote control. It allows you to get deeper into movies with Cinema mode and hear every detail of your favourite tracks in Music mode. Plus, there are additional Voice mode and Night mode settings. Voice mode tailors sound settings to accentuate speech, so you won't miss a word and Night mode optimises the sound balance, so you can hear everything clearly, even at low volume levels.

The **HT-G700** comes with a powerful, wireless subwoofer and a larger cabinet size that delivers a deeper, richer bass sound. Finally, set-up with a TV is quick and easy via Bluetooth® or HDMI eARC/ARC.

The **HT-G700** Sound Bar from Sony will be available from September 2020 and its price will be announced at a later time.
