Sony's New 5.1ch Sound Bar HT-S20R Brings the Ultimate Cinema Experience to Home Entertainment Enthusiasts

Hong Kong, May 22, 2020 – Put yourself at the heart of the action with the new Sony 5.1ch Sound Bar, the HT-S20R. Powered with Dolby® Digital technology, this new pocket-friendly Sound Bar system is designed to combine dramatic, high-quality sound with exceptional 400W power output.

The HT-S20R delivers an audio experience like none other by giving movies the soundtrack they deserve with 5.1 channels of real surround sound. Users can expect dynamic, immersive and cinematic surround sound with its rear speakers and external subwoofer that works with a 3ch soundbar.

Setting up the HT-S20R is extremely straightforward. Simply plug it in, position the external subwoofer, wire up the rear speakers and you're ready to go. Say goodbye to cable clutter, as the HT-S20R supports HDMI ARC which lets you connect to compatible TV's with a single cable. For non-HDMI compatible TV's, the HT-S20R offers the option of connecting to the optical input or analogue input for you to still enjoy the high-quality sound it produces.

Even better, the HT-S20R also allows you to pick the mode that best suits the content being played with just a click of a button- from Auto, Standard, Cinema and Music, the HT-S20R offers it all. You can also select Night and Voice modes and use the subwoofer control to fine tune your viewing and listening experience.

On top of movies and TV, you will also be able to easily play music through the HT-S20R. Listen to your favourite tracks by either wirelessly streaming through your smartphone using Bluetooth® connection or use the HT-S20R's USB port to plug and play from a USB memory stick.

The new **HT-S20R** 5.1ch Sound Bar from Sony will be available from June 2020 at HK\$1,990.

For customer enquiries, please contact Sony hotline service at (852) 2833-5129.
