Press Release

Sony Introduces New Green Colour Version of 5G Flagship Xperia 1 II with 12GB RAM

Built for Speed, the award-winning Xperia 1 II is the World's Firstⁱ Smartphone with up to 20fpsⁱⁱ AF/AEⁱⁱⁱ Tracking Burst and 5G Connectivity for a Complete Creative Entertainment Experience

Hong Kong, October 16, 2020 – Sony has further strengthened its Xperia flagship 5G enabled smartphone line-up with the introduction of the new Green Colour Version of **Xperia 1 II** (Mark two). Built for speed, the new 5G model features 12GB RAM to enable you to create and enjoy content effortlessly through the market-leading technologies from across the Sony technology portfolio.

Xperia 1 II has been presented the “EISA MULTIMEDIA SMARTPHONE 2020-2021” by the internationally renowned “Expert Imaging and Sound Association” (EISA).

Making the most of 5G

Built for speed, the 5G enabled **Xperia 1 II** was created with professional work flows in mind. Benefitting from Sub-6 network support, **Xperia 1 II** offers uncompromised high-quality content access.

The Qualcomm® Snapdragon™ 865 5G Mobile Platform and the Snapdragon X55 5G Modem-RF system empower you to game, capture, cross-task and connect like never thought possible with staggering multi-gigabit 5G speeds and improved performance with 25% faster CPU and GPU than previous model.

This 5G model is built for speed to help you create and enjoy content effortlessly through the incorporation of market-leading technologies across from the Sony technology portfolio, including:

- 20 fpsⁱⁱ burst shooting with 60 times per second^{iv} AF/AEⁱⁱⁱ calculations from Sony's Alpha™ interchangeable lens cameras.
- Creator mode and cinema recording function Cinematography Pro “powered by CineAlta” from Sony’s professional solutions business division
- X1™ for mobile based on technology from BRAVIA® TV

Capture a decisive moment with high-speed shooting

Designed with Sony’s Alpha™ industry-leading AF technology, the newly developed triple lens camera supports advanced photo technologies with outstanding ZEISS optics, calibrated specifically for **Xperia 1 II** and ZEISS T* Coating contributes to exquisite rendering and contrast by reducing reflections.

Utilising technology developed for Alpha™ interchangeable lens cameras, **Xperia 1 II** offers continuous AF that performs AF / AEⁱⁱⁱ calculations at 60 times per second^{iv}. This enables the world’s firstⁱ AF / AEⁱⁱⁱ continuous tracking for high-speed shooting at a maximum of 20 fpsⁱⁱ which is especially useful for shooting moving subjects such as children or animals^v and fast-moving sports. Focus and follow the subject with high precision and capture decisive moments that you do not want to miss. Furthermore, Real-time Eye AF, which locks focus on the subject’s eyes for stunning portrait shots, is now available for both humans and animals.

Xperia 1 II's fast focus also works in low light conditions delivering quality images in challenging circumstances thanks to the four technologies working together, including Dual photo diode sensor^{vi}, an auto-focus system that covers approximately 70 percent of the sensor^{vii}, 3D iToF sensor^{viii} and a new large 1/1.7" Exmor RS™ for mobile sensor, making it 1.5x more sensitive than the previous model and resulting in a faster and an accurate AF in low light shooting.

The triple lens camera offers fantastic versatility with three focal lengths: 16mm/24mm/70mm. The new Photography Pro “technology from Alpha™” brings a user interface that is aligned to Alpha™ photographers, with manual controls to set ISO, shutter speed and more.

Imaging Edge for Mobile connects **Xperia 1 II** to Sony's Alpha™ cameras^{ix} enabling you to use the phone to remotely control the focus mode and ISO sensitivity among other settings. This also allows users to transfer photos taken on Alpha™ to **Xperia 1 II** to review colours and hues with professional grade accuracy.

With Cinematography Pro “powered by CineAlta” newly supports 2K 120fps 10-bit HDR cinematic high frame rate shooting^xand Cinematic 21:9 4K HDR recording at 24/25/30/60fps^{xi}, it enhances the cinematographic shooting experiences. Touch AF, Metered Manual controls for setting exposure, Level meter and improved white balance settings offer a more manual control, while the unique Intelligent Wind Filter technology from Sony reduces noise and wind interference for clear audio recording.

Smart and powerful

Xperia 1 II is powered by a high-capacity 4,000mAh battery with fast charge that charges up to 50% in just 30 minutes^{xii} and features Qi fast wireless charging for a fast battery boost on the move. Sony continues to develop battery technologies to improve the lifespan and keep the battery healthier for longer including AI-powered ‘Battery Care’ that adapts to your personal routine.

Immerse yourself in entertainment

Whether you’re listening to music or watching movies, **Xperia 1 II** is finely tuned for an immaculate entertainment experience. Motion blur reduction technology reduces frame lag for a clearer image quality. and with Dolby Atmos® sound, tuned in collaboration with Sony Pictures Entertainment, the result is a multi-dimensional surround sound experience.

The aural experience is taken even further with the world’s first^{xiii} smartphone with 360 Reality Audio hardware decoding to optimise sound quality when listening to music on global music and entertainment platform, TIDAL^{xiv}.

High-quality music can be enjoyed through the front stereo speakers or in combination with wired headphones with the 3.5mm jack or wireless headphones. Significant audio tuning has reduced crosstalk to an imperceptible 20dB - over 90% lower than USB-C headphone connections.

In addition to High-Resolution and High-Resolution Wireless Audio^{xv}, **Xperia 1 II** introduces DSEE Ultimate. This new technology utilises AI to automatically improve audio frequency and bit rate in real-time, taking each track close to high-resolution audio. It works with wired or wireless headphones, with local or streaming music.

Gaming on the go

Enjoy an unrestricted view of your gaming action on a 21:9 display. The 21:9 mobile gaming experience combined with direct connection to PlayStation®4's DUALSHOCK®4^{xvi} Wireless Controller makes gaming on the go more fun. Game Enhancer, a feature that was first introduced on **Xperia 1** to enhance the mobile gaming experience, has been improved with additional functionality on **Xperia 1 II**. It will now support Competition Set which pins game App to the screen and turns Xperia to a game first and focused device, even suitable for competition match for E-sports.

Xperia 1 II comes with IP65/68 water and dust resistance^{xvii} and Corning® Gorilla® Glass 6 on both sides, making it sturdy as well as beautifully designed.

Available in Green, Purple, Black and White colour options, **Xperia 1 II** is equipped with Android™ 10. The Green Colour version will be launched in the beginning of November 2020 while the suggested retail price will be announced at a later date.

Accessories

To compliment with **Xperia 1 II** you can also purchase one of the stylish matching covers. *Xperia 1 II Style Cover View* which effortlessly blend with two colours available: Black and Purple. *Xperia 1 II Style Cover with Stand* is also available in Black and Purple, a slim case with an integrated kickstand so you can comfortably view the screen, watch movies, and play games.
